Somnoware Diagnostics 1.2503.0

Product description

Somnoware Diagnostics is a cloud-based software that streamlines diagnostic testing workflows in the sleep and respiratory care industry. It orchestrates data flow between medical devices and unifies datasets within a single platform.

What's new

- Physicians can now select the primary night when finalizing a cloud-based home sleep test (HST) study.
- On the **Compliance** tab, users can select the **Unmatch** menu option to unlink a Somnoware patient from an external DME source.
- Somnoware automatically re-adds in-lab sleep test patients marked as **No show** to the **AST waitlist** with high priority status.
- On the **Interpretation** tab, physicians can now see values next to items in the **Insert patient data** list. For example, the list displays **AHI (5)**.

System requirements

Supported browsers

- Google Chrome™
- Microsoft® Edge™
- Firefox®
